Hello, John!

I understand more public meetings on the development of this new program will be held around the country. In light of the extended drought and rapid population growth of the Southwest, I strongly urge that a meeting be held in the Phoenix area in the very near future. There are numerous interested agencies and advocates for an efficient product labeling program in Arizona. This program would be very timely with the Governor's Drought Task Force and other regional and local efforts.

I understand Tom Babcock has volunteered to assist in the effort to hold a meeting here. I would also be willing to help. Please feel free to contact me if I can be of any assistance.

Sincerely,

Thank you for your efforts on this worthwhile program.
